Business Analyst Intern

About me

Analytical BICT (Hons) undergraduate at the University of Colombo with hands-on experience in Business Analysis, digital platform strategy, process modeling, and financial feasibility evaluation. Skilled in preparing investor-ready business reports, cost models, user journey maps, and growth forecasts for AI-powered SME platforms, logistics marketplaces, and healthcare service systems. Combines full-stack development knowledge with business-oriented analytical thinking to design scalable, user-centric digital solutions.

Work Experience

Business Analyst Intern / *Fishifox Pvt Ltd, Sri Lanka* / 2025 – Present / Remote

- Supporting business analysis and digital product strategy initiatives across the company's core platform and service offerings.
- Assisting in requirement gathering, stakeholder communication, and documentation of business processes and workflows.
- Contributing to market research, competitive analysis, and feasibility assessments to inform product and growth decisions.

Education

University of Colombo

- BSc (Hons) Information & Communication Technology
- Aug 2023 – Present | Expected: 2027

ESOFT METRO CAMPUS

- Diploma in English

Biyagama Central College

- G.C.E Advanced Level – Engineering Technology Stream
- Completed: February 2022

Projects and Experiences

YMe.lk – AI-Powered SME Digitalization Platform | 2026

- Designed a three-tier SME subscription model (Free, Professional, Premium) with feature differentiation and upsell pathways to drive platform monetization.
- Conducted operational cost analysis across Gemini AI, META/SMS, Google Maps API, and Cloudflare infrastructure to establish accurate per-user cost benchmarks.
- Built financial models for 10,000+ daily users covering break-even timelines, booking margin analysis, and worst-case scenario stress testing.
- Developed a 10-month growth forecasting model and compiled stakeholder-ready strategic reports and investor presentation decks.

Key Skills: Business Analysis · Financial Modeling · Pricing Strategy · Cost Analysis · AI Platform Economics · Growth Forecasting

ROUTELY – Smart Courier Marketplace & Directional Delivery Platform | 2026

- Performed comprehensive Sri Lankan logistics and e-commerce market analysis, quantifying last-mile delivery inefficiencies and documenting addressable gaps to define platform positioning.
- Designed end-to-end operational workflows covering courier booking, driver onboarding & KYC, intelligent route matching, delivery verification checkpoints, and automated escrow payment settlement.
- Conducted detailed competitor benchmarking against PickMe, Domex, DHL, and Koombiyo — evaluating pricing models, service coverage, technology capabilities, and market share to identify ROUTELY’s differentiation opportunities.
- Created process flow documentation and system interaction models (stakeholder maps, data flow diagrams, and state transition models) to support both development and investor communication.
- Assembled a statistically validated investor-facing business proposal with audited market size references and strategic growth projections.

Key Skills: Process Modeling · Logistics Analysis · Platform Strategy · Workflow Documentation · Market Research · Competitive Analysis

Elderly Care Outsourcing Platform – MVP Proposal | 2026

- Scoped and defined the MVP feature set for a caregiver outsourcing platform targeting Sri Lanka’s underserved elderly care market, with a phased rollout strategy prioritising trust, safety, and accessibility.
- Designed caregiver-client matching workflows including profile creation, preference filtering, compatibility scoring, and booking confirmation flows; created onboarding and background verification processes with administrator review queues.
- Produced detailed user journey maps for three key personas (elderly client, family coordinator, caregiver), alongside platform architecture documentation and system interaction diagrams.

Key Skills: Healthcare Platform Analysis · User Journey Design · Requirement Analysis · Workflow Modeling · MVP Scoping
