Business Analyst Intern

About me

Business Analyst Intern and BICT (Hons) undergraduate at the University of Colombo with hands-on experience in business analysis, requirements gathering, process modeling, market research, financial feasibility analysis, and digital product strategy. Skilled in documenting business requirements, stakeholder communication, workflow analysis, user journey mapping, and data-driven decision-making. Experienced in developing business cases, financial models, growth forecasts, pricing strategies, and investor-ready reports for AI-powered platforms, logistics marketplaces, and healthcare solutions. Combines technical knowledge in full-stack development with strong analytical and problem-solving skills to deliver scalable, user-centric digital products. Seeking opportunities to contribute to business transformation, process optimization, and product strategy initiatives.

Work Experience

Business Analyst Intern | Fishifox Pvt Ltd, Sri Lanka | 2025 – Present | Remote

- Supporting business analysis and digital product strategy initiatives across the company's core platform and service offerings.
- Assisting in requirement gathering, stakeholder communication, and documentation of business processes and workflows.
- Contributing to market research, competitive analysis, and feasibility assessments to inform product and growth decisions.

Projects and Experiences

YMe.lk – AI-Powered SME Digitalization Platform | 2026

- Designed a scalable three-tier SME subscription model (Free, Professional, and Premium), defining pricing structures, feature segmentation, and revenue optimization strategies to drive platform monetization.
- Performed end-to-end cost and profitability analysis across AI, communication, mapping, and cloud infrastructure services, enabling data-driven pricing and financial planning.
- Developed financial and unit economics models for 10,000+ projected daily users, evaluating break-even timelines, contribution margins, revenue scenarios, and business sustainability.
- Created growth forecasting and market expansion models, translating analytical insights into investor-ready business cases, strategic reports, and executive presentations for stakeholder decision-making.

Key Skills: *Business Analysis · Financial Modeling · Pricing Strategy · Cost Analysis · AI Platform Economics · Growth Forecasting*

ROUTELY – Smart Courier Marketplace & Directional Delivery Platform | 2026

- Analyzed Sri Lanka's logistics and e-commerce landscape to identify operational inefficiencies, market opportunities, and strategic positioning for a technology-driven courier marketplace.
- Designed and documented end-to-end business processes, including courier operations, driver onboarding, KYC compliance, route matching, delivery verification, and payment workflows.
- Conducted competitor benchmarking and market intelligence research across major logistics providers, identifying service gaps, differentiation opportunities, and potential revenue drivers.
- Produced process models, stakeholder analyses, and system workflow documentation to facilitate business requirements definition and solution development.
- Developed an investor-focused business case supported by market research, growth projections, and data-driven strategic recommendations.

Key Skills: *Process Modeling · Logistics Analysis · Platform Strategy · Workflow Documentation · Market Research · Competitive Analysis*

Elderly Care Outsourcing Platform – MVP Proposal | 2026

- Conducted business analysis and MVP scoping for a digital elderly care platform, defining core features, user requirements, and a phased implementation strategy.
- Designed and documented business workflows for caregiver onboarding, client matching, booking management, and verification processes to enhance user experience and operational efficiency.
- Created user journey maps, stakeholder analyses, and system interaction models for multiple user personas, supporting product strategy, requirements gathering, and solution design.

Key Skills: *Healthcare Platform Analysis · User Journey Design · Requirement Analysis · Workflow Modeling · MVP Scoping*
